ODP O-177
14 February 1980

MEMORANDUM FOR: Deputy Director for Administration

FROM: Bruce T. Johnson
Director of Data Processing

SUBJECT: ODP Report for Week Ending 13 February 1980

IBM Minicomputer Installed

The IBM 4331 minicomputer system for the GIMINI (GIMS on a mini) Project was delivered on 5 February. Installation and checkout are now under way in the Ruffing Center. The system is scheduled to be turned over to ODP on 15 February.

STATINTL

Office Automation Symposium

Personnel from ODP attended an ORD sponsored symposium on Office Automation on 4-5 February. The speakers were ████████████████████. In presenting an overview of office automation, they stressed the advances that CIA has made or is developing in several areas; for example, tying Mag Card typewriters and high quality printers into the VM Time Sharing network and developing the Delta Data 7000 terminal as an online or offline word processing device.

STATINTL

STATINTL

NPIC Equipment

ODP concurred with NPIC on its procurement request to purchase UNIVAC equipment currently being leased and is reviewing a priority request from NPIC for the acquisition of a stand alone UNIVAC 1100/81 development system. The total FY-80 cost for these two actions is in excess of $1 million, but the system life cost avoidance of purchase versus continued rental is projected to exceed $1 million. ████████

STATINTL

SAFE

On 8 February [redacted] gave a SAFE status briefing to the DCI's Scientific and Technical Advisory Panel.

[redacted] briefed Messrs. Kimel and Prosser of the Investigative Staff of the House Appropriations Committee (HAC) on 12 February. The briefing covered cross-Agency ADP and bibliography reference systems. They are preparing a report for the HAC in preparation for the FY-81 Budget Review. [redacted]

Support to Intelligence Community

4C - Community-wide Computer Assisted Compartmentation Control System. A meeting was held on 5 February to review the status of the 4C system development. It was attended by the SA/DCI/C and his Deputy, and by [redacted] [redacted] from SSC/OS, and [redacted] from ODP. Several near term tasks were established to support both FY-81 budget activity and initiation of the 4C development cycle. [redacted]

Support to OPPPM

PERSIGN - Integrated Personnel Management Information System. We met with OF and OPPPM personnel on 7 February to determine if PERSIGN could be implemented on the earliest possible implementation date, 24 February 1980. We decided that PERSIGN could not be implemented because OF has not completed their balancing of required data, and OPPPM has not received the forms needed for running the system. Everything is still "go" for 9 March 1980. [redacted]

Support to Office of Logistics

P&PDMIS - Minicomputer Based Management Information System. The vendor, [redacted] has delivered all items in the statement of work for the original contract. Final payment for the delivered items has been authorized by the COTR. The vendor continues to work on the micrographic enhancement and reduction of the report execution time. [redacted]
